NOTES TO FINANCIAL STATEMENTS**Note 1 – Summary of Significant Accounting Policies and Going Concern****A. Accounting Practices**

The accompanying statutory-basis financial statements of Sentinel Insurance Company, Ltd. (the "Company" or "Sentinel") have been prepared in conformity with statutory accounting practices prescribed or permitted by the State of Connecticut Insurance Department ("the Department"). The Department recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the State of Connecticut Insurance Law. The National Association of Insurance Commissioners' Accounting Practices and Procedures manual ("NAIC SAP") has been adopted as a component of prescribed practices by the State of Connecticut. There are no material differences between the accounting practices and procedures prescribed by the Department and NAIC SAP. During 2020 and 2019, the Company did not have any permitted practices.

C. Accounting Policy

- The Company had no Securities Valuation Office - identified investments in exchange traded funds or bond mutual funds that qualified for bond accounting treatment.
- Loan-backed bonds and structured securities are carried at either amortized cost or the lower of amortized cost or fair value in accordance with the provisions of Statement of Statutory Accounting Principles ("SSAP") No. 43-Revised (Loan-backed and Structured Securities). Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method, except for highly rated fixed rate securities, which use the retrospective method.

Note 2 – Accounting Changes and Corrections of Errors

On April 15, 2020, the Statutory Accounting Principles Working Group ("SAPWG") of the NAIC adopted four interpretations of statutory accounting principles, one of which gives insurers relief with respect to issues arising from reference rate reform, including the discontinuance of the London Interbank Offered Rate ("LIBOR"), and three of which are intended to give insurers relief with respect to issues encountered in the COVID-19 pandemic. Where applicable, the Company is adopting all interpretations effective beginning with first quarter financial reporting. The Company has not measured the effect of adoption on its financial position, cash flows or net income because the guidance provides relief from accounting and therefore disclosure.

INT 20-01 allows insurance companies to account for contract modifications made solely due to rate reform (such as replacing LIBOR with another reference rate) as continuations of existing contracts and to maintain hedge accounting when the hedging effectiveness between a financial instrument and its hedge is only affected by the change to a replacement rate. As a result, insurance companies will not recognize gains and losses during the transition period of LIBOR to an alternative reference rate that would otherwise have arisen from accounting assessments and remeasurements. The guidance expires for contract modifications made and hedge relationships entered into or evaluated after December 31, 2022.

INT 20-02 provides an exception to the 90-day rule for nonadmittance of policyholder and similar receivables in Q1 and Q2 2020. Uncollected amounts are in scope of INT 20-02 for policies and contracts with self-insureds in effect and current before March 13, 2020 (the date of the federal COVID-19 emergency declaration) and for policies and contracts written or renewed on or after March 13, 2020.

INT 20-03 provides exceptions from reporting modifications of mortgage and bank loan terms in response to COVID-19 for modifications made during a temporary period beginning on March 1, 2020 and ending on the earlier of December 31, 2020, or 60 days after the national emergency concerning COVID-19 terminates. Mortgage and bank loans granted modifications such as a forbearance arrangement, an interest rate modification, a repayment plan, and other similar arrangement that defers or delays the payment of principal or interest for a loan are not characterized troubled debt restructurings. The INT is applicable for the term of any loan modification and only applies to a loan that was not more than 30 days past due as of December 31, 2019.

INT 20-04 provides exceptions for impairment characterization and assessment related to mortgage and bank loans and investments with underlying mortgage loans that would otherwise be required in 1Q and 2Q 2020. INT 20-04 does not require an impairment identification for mortgage loans with payments deferred and/or modified in response to COVID-19. INT 20-04 also provides limited-scope provisions for assessing impairment for investments with underlying mortgage loans impacted due to fair value declines if the entity does not intend to sell the investment.

The Company's financial instruments held at fair value were not material.

B. Other Fair Value Disclosures

Not applicable.

C. Fair Values for All Financial Instruments by Levels 1, 2 and 3**Valuation Inputs for Investments**

For Level 1 investments, valuations are based on observable inputs that reflect quoted prices for identical assets in active markets that the Company has the ability to access at the measurement date.

For the Company's Level 2 and 3 debt securities, typical inputs used by pricing techniques include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and /or estimated cash flows, prepayment speeds, and default rates.

A description of additional inputs used in the Company's Level 2 and Level 3 measurements is listed below:

Level 2 The fair values of most of the Company's Level 2 investments are determined by management after considering prices received from third-party pricing services. These investments include most bonds.

Level 3 Most of the Company's securities classified as Level 3 include less liquid securities such as lower quality asset-backed securities, commercial mortgage-backed securities, commercial real estate, collateralized loan obligations and residential mortgage-backed securities primarily backed by sub-prime loans. Also included in Level 3 are securities valued based on broker prices or broker spreads, without adjustments. Primary inputs for non-broker priced investments, including structured securities, are consistent with the typical inputs used in the Level 2 measurements, but are Level 3 due to their less liquid markets. Additionally, certain long-dated securities are priced based on third party pricing services, including certain municipal securities, foreign government/government agency securities and bank loans. Primary inputs for these long-dated securities are consistent with the typical inputs used in the preceding noted Level 1 and Level 2 measurements, but include benchmark interest rate or credit spread assumptions that are not observable in the marketplace.

The tables below reflect the fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures and partnerships).

NOTES TO FINANCIAL STATEMENTS

The fair value of bonds in an active and orderly market (e.g., not distressed or forced liquidation) are determined by management using a "waterfall" approach after considering the following pricing sources: quoted prices for identical assets or liabilities, prices from third-party pricing services, independent broker quotations, or internal matrix pricing processes. Typical inputs used by these pricing sources include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates. Most bonds do not trade daily. Based on the typical trading volumes and the lack of quoted market prices for bonds, third-party pricing services utilize matrix pricing to derive security prices. Matrix pricing relies on securities' relationships to other benchmark quoted securities, which trade more frequently. Pricing services utilize recently reported trades of identical or similar securities making adjustments through the reporting date based on the preceding outlined available market observable information. If there are no recently reported trades, the third-party pricing services may develop a security price using expected future cash flows based upon collateral performance and discounted at an estimated market rate. Both matrix pricing and discounted cash flow techniques develop prices by factoring in the time value for cash flows and risk, including liquidity and credit.

The amortized cost of short-term investments approximates fair value.

D. Financial Instruments for Which Not Practicable to Estimate Fair Values

At March 31, 2020 the Company had no investments where it is not practicable to estimate fair value.

Note 21 – Other Items

The pandemic caused by the spread of COVID-19 is a current trend that contributes to reserve uncertainty. The Company has exposure to other liability claims, including from bodily injury, property damage and product liability and to workers' compensation claims, including from injury, illness or disability to an insured's employee while at work. Benefits paid under workers' compensation policies may include reimbursement of medical care costs, replacement income and compensation for permanent injuries and benefits to survivors. Reserves for these exposures can be particularly difficult to estimate due to the long development pattern and uncertainty about how cases will settle. Under workers' compensation, we could experience higher loss costs if it is determined that workers were exposed to COVID-19 while on the job, such as in the health care industry. We could also incur losses on other liability policies if claimants can successfully assert that insureds were negligent from protecting employees, customers and others from exposure. Under commercial property policies, some insured businesses may try to assert coverage for business interruption despite policy exclusions and the general requirement that there be direct physical loss or damage to the property. There is also an increased risk of COVID-19 related claims under directors' and officers' insurance policies.

Note 22 – Events Subsequent

Since March 31, 2020, governments worldwide continue to enact emergency measures to combat the spread of the novel strain of coronavirus specifically identified as the Coronavirus Disease 2019 ("COVID-19") pandemic. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. As a result, global equity markets continue to experience significant volatility and weakness, which have prompted governments and central banks to react with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 pandemic is unknown at this time, as is the effectiveness of those interventions. In addition, in April, 2020, a number of states have ordered or requested that we issue refunds or credits to personal lines and commercial lines policyholders, retroactive to the month of March in some cases, given layoffs and reduced economic activity associated with the COVID-19 pandemic to the extent those effects have reduced the Company's exposure to risk. The Company is evaluating these orders and will seek to obtain further information from the regulators to determine the financial effects, if any, beyond those the Company has already contemplated. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial condition, operating results or liquidity of the Company in future periods.

The Company had no other material subsequent events through the filing date of May 12, 2020.

Note 23 – Reinsurance

No significant change.

Note 24 – Retrospectively Rated Contracts & Contracts Subject to Redetermination

F. Risk-Sharing Provisions of the Affordable Care Act (ACA)

The Company did not write any accident and health insurance premium during the reporting period that is subject to the Affordable Care Act risk-sharing provisions.

Note 25 – Changes in Incurred Losses and Loss Adjustment Expenses

Reserves as of December 31, 2019 were \$61,202,388. Prior accident year reserves are now \$57,384,168 as a result of payments and reserve changes attributable to insured events of prior accident years. From January 1, 2020 through March 31, 2020, \$3,789,254 has been paid for loss and loss adjustment expenses attributable to insured events of prior accident years. In addition, the Company released reserves of \$28,966, related to the re-estimate of unpaid losses and loss adjustment expenses for prior years. These reserve changes are mainly due to the release of reserves related to catastrophes for accident years 2017 and 2019 and to a lesser extent workers' compensation and personal auto liability, partially offset by increases in other liability and commercial auto liability reserves.
